***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Species of the embodiment disclosed in Page 4, line 31 starting with  
"Computing" - Page 5, line 5, in particular wherein:

"Computing device 16 may be configured to send image (or print) data 40 defining an image to printer 12. Alternatively, or in addition, the computing device may be configured to parse data into image data sets corresponding to individual output swaths, convert the data to a different form, and/or distribute the image data to a flexible number of pass assignments based on the content of the image data, among others".

II. Species of the embodiment disclosed in Page 5, lines 5-6, in particular wherein:

"However, in the present illustration, printer 12 is configured to perform these and other tasks".

III. Species of the embodiment disclosed on Page 8, line 31 – Page 9, line 2, in particular wherein:

"The particular position may be, for example, nozzles disposed adjacent the periphery of a nozzle array and/or a subset of nozzles having a distinct orifice size, a nozzle associated with a distinct type of firing element, and/or the like".

IV. Species of the embodiment disclosed on Page 5, lines 16-24, in particular wherein:

"The printing apparatus contains a controller and wherein the printer processor may be configured to perform manipulation of image data.....and wherein the processing instructions maybe contained in printer memory.....and may include a data distribution mechanism".

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include**

**(i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and**

**(ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
